

HEN HATCH MINER

HOW DOES THIS WORK?

You invest USDT (BEP20) to get Hens. They generate you eggs. The more hens you acquire the more eggs they lay, which you could then sell, generating you passive income!

WHAT IS THE DAILY PERCENTAGE?

It depends on how much you decide to compound your eggs. We have a system in place that lowers income if someone decides to eat all the eggs themselves! Meaning if you don't compound your interest more often than you claim, you would start getting lower percentage returns until you hit 0.5% per day!

Best strategy is 6 days Re-invest, 1 day Claim Rewards!

HOW DOES HATCH WORK?

Pretty simple! When you have daily income from your hens, Hen Hatch will re-invest it to get more eggs from your hatch! In return you get more USDT each time. More Eggs! = More USDT!

OPTIMAL EARNING STRATEGY?

Best strategy is to Reinvest 6 days and then claim on 7th day. This will keep your interest rate high in our system, simple!

WHAT HAPPENS IF I ONLY CLAIM MY REWARDS?

Our system is made to last long term, so we have an system in place to punish greedy hen owners. If you CLAIM your rewards constantly without ever RE-HATCHING you will be tagged by our system and your Interest rate will be lowered to 0.5% per day.

HOW HEN PRICE IS CALCULATED?

It's auto adjusted by total value locked in the contract so even late Hen owners can profit from this!

IS IT SAFE?

Yes, there's no function available to contract deployer to run off with the money. If you have any doubt about our legitimacy check "baked beans" project, we are fork of them and that contract is audited and safe! Please always make sure before investing any money, we don't want any unnecessary FUD in our telegram community! :) HaPPY iNVESTING!
